Re: **Reissuance/Modification** of VPDES Permit No. **VA0026247**; Town of Boydton WWTP; Mecklenburg County, Virginia

Dear Mayor Wrenn:

Your VPDES permit is enclosed along with the final public participation item (No. 29) of the fact sheet. The first DMR required by this permit for monthly monitored parameters is due on August 10, 2012 for the period of July 1 - July 31, 2012. The DMR for quarterly monitored parameters is due on October 10, 2012 for the period of July 1 - September 30, 2012. The DMR for annually monitored parameters is due on January 10, 2014 for the period of January 1 - December 31, 2013. If you still have DMR data to report as required by the previous permit please submit it as an attachment to the first DMR required by this permit. Monitoring results on the DMRs should be reported to the same number of significant digits as are included in the permit limit for the parameter.

DEQ has launched an e-DMR program that allows you to submit the effluent data electronically. We expect every permittee to use e-DMR as permits are reissued, and exceptions will only be granted on a case-by-case basis. There are many benefits to both DEQ and the permittee when e-DMR is utilized for submissions:

- Fewer revisions for data since the e-DMR program automatically flags omissions before the data are submitted;
- Cost savings on postage, copying and paper;
- No concerns about using the most current DMR - e-DMR refreshes the required parameters automatically when changes are needed;
- Submittals can be made on a timelier basis; and
- Electronic signatures from multiple people are allowed and e-DMR can be accessed from multiple computer locations.

Hard copies of the DMRs are not enclosed; however, an electronic DMR is available through e-DMR. If you have not already done so, please register for e-DMR participation now in order for the e-DMR application to be processed prior to the first DMR due date for this modification, and to avoid non-compliance with the permit reporting requirements. You may contact our regional e-DMR administrator, Peggy Barbour, at (434) 582-6203 or peggy.barbour@deq.virginia.gov for further assistance. You may also visit the following website for additional details regarding the e-DMR system: <http://www.deq.virginia.gov/water/edmrfaq.html>.

As provided by Rule 2A:2 of the Supreme Court of Virginia, you have thirty days from the date of service (the date you actually received this decision or the date it was mailed to you, whichever occurred first) within which to appeal this decision by filing a notice of appeal in accordance with the Rules of the Supreme Court of Virginia with the Director,

Department of Environmental Quality. In the event that this decision is served on you by mail, three days are added to that period.

Alternatively, any owner under §§ 62.1-44.16, 62.1-44.17 and 62.1-44.19 of the State Water Control Law aggrieved by any action of the State Water Control Board taken without a formal hearing, or by inaction of the Board, may demand in writing a formal hearing of such owner's grievance, provided a petition requesting such hearing is filed with the Board. Said petition must meet the requirements set forth in 9 VAC 25-230-130 (Procedural Rule No. 1 - Petition for formal hearing). In cases involving actions of the Board, such petition must be filed within thirty days after notice of such action is mailed to such owner by certified mail.

If you have any questions about the permit, please contact Leah Revelle at (434) 582-6219 or leah.revelle@deq.virginia.gov.

Sincerely,

A handwritten signature in blue ink, appearing to read "Robert J. Weld", is written over a horizontal line.

Robert J. Weld
Regional Director

Water Quality Standards Variance Form

Documentation that water quality standards variance or water effect ratio (WER) procedure was duly processed according to state law. When the steps outlined below are followed and the form is signed, then a 'blanket' certification from the Attorney General's Office applies and states that the variance or WER was duly adopted according to state law. This is a necessary component for EPA approval of water quality standards variances or WERs.

- the variance or WER has been approved by the Department of Environmental Quality,
- the variance or WER applies to only the applicant or permittee in this proceeding,
- the variance or WER shall not prevent the maintenance and protection of existing uses or exempt the discharger or regulated activity from compliance with other appropriate technology or water quality-based limits or best management practices,
- the variance or WER was described in the 30-day public notice published for the permit and public comment was requested,
- the variance or WER public notice for the permit was published in a newspaper of general circulation in the area of interest,
- if a public hearing was held on the variance or WER, the public notice of hearing was published in a newspaper of general circulation,
- if a hearing was held, the State Water Control Board voted to grant the variance or WER request,
- the variance expires at the time of permit expiration, unless the permittee makes a showing that the variance still applies,
- the variance and WER have been duly processed with the permit according to all applicable laws and regulations and is so certified by the position authorized to approve the VPDES permit (signature below):

DEPARTMENT OF ENVIRONMENTAL QUALITY

Permit No. VA0026247
Effective Date: June 2, 2012
Expiration Date: March 7, 2016

AUTHORIZATION TO DISCHARGE UNDER THE VIRGINIA POLLUTANT DISCHARGE ELIMINATION SYSTEM

AND

THE VIRGINIA STATE WATER CONTROL LAW

In compliance with the provisions of the Clean Water Act as amended and pursuant to the State Water Control Law and regulations adopted pursuant thereto, the following owner is authorized to discharge in accordance with the effluent limitations, monitoring requirements, and other conditions set forth in this permit.

Owner: Town of Boydton
Facility Name: Town of Boydton Waste Water Treatment Plant
City: N/A
County: Mecklenburg
Facility Location: 950 Carter Lane Road, Boydton, Virginia

The owner is authorized to discharge to the following receiving stream:

Stream: Coleman Creek
River Basin: Roanoke River
River Subbasin: Roanoke River
Section: 1
Class: III
Special Standards: PWS

The authorized discharge shall be in accordance with this cover page, Part I - Effluent Limitations and Monitoring Requirements and Part II - Conditions Applicable To All VPDES Permits, as set forth herein.
